ALM ANNOUNCES PARTNERSHIP WITH RP SUPPORT IN UK MARKET

Advanced Laser Materials LLC (ALM), an industry leading provider of high performance engineered polymers and chemicals for rapid prototyping and manufacturing processes, has announced it has signed an agreement to work in partnership with RP Support, a leading service provider to the UK Rapid Prototyping market.

Through this new partnership, ALM will provide RP Support access to the complete range of ALM Laser Sintering powders for sole distribution into the UK market. ALM's range of laser sintering materials comprises 12 general powders including PA 650 a drop-in replacement for other PA 12 nylon powders, PA 615-GS a highly glass sphere filled material, PA 601-CF a carbon fibre filled powder and FR 106 a fire retardant powder. Other materials in the range include highly recyclable, light weight, and aluminium filled nylons. In addition to this ALM offer development of bespoke powders for key customer applications.

David Storey, RP Support Director commented "We are very pleased to have the opportunity to work with ALM in this strategic partnership. The innovative portfolio of sintering powders is a highly complementary addition to RP Support's current product line and supports our business model for future growth."

RP Support utilised the TCT Live 2010 exhibition in Coventry, UK as a platform to introduce the range of materials into the UK market and are adding the ALM sintering materials to their current range of services, support, hardware, software and stereolithography material solutions already provided for customers in the advanced digital manufacturing market.

For further information on ALM's range of laser sintering powders or to download product technical data sheets go to www.alm-llc.com.

About Advanced Laser Materials (ALM)

ALM specializes in providing customers with LS (Laser Sintering) solutions for their most challenging applications. ALM builds customer relationships focused on delivering timely results to quickly capture new markets. ALM employs industry experts in LS processing, materials science, and chemical production. **ALM is a Limited Liability Company operating in the State of Texas.** For more information, please call ALM's main office at 254.773.3080 or visit ALM's website www.alm-llc.com.
